

Syrreal Watson

Electrical Engineer & AI Graduate Student

I am an Electrical Engineer at Northrop Grumman and a Master's student in Artificial Intelligence at Johns Hopkins University. My interests include machine learning, software development, RF systems, and creative technology. I enjoy building innovative projects that combine engineering, AI, and design.

Projects

Module 1 Assignment: Personal Website

A personal developer website built with Flask, HTML, and CSS. Features a homepage with biography and profile photo, a projects page, and a contact page. Uses Flask blueprints for page routing and a shared base template for consistent navigation.
